PROFESSIONAL SUMMARY

Full-Stack Software Developer with 2+ years of experience delivering enterprise applications using **.NET Core**, **C#**, **Angular 15+**, and **MS SQL**. Proficient in **REST API** design, **Entity Framework Core**, **LINQ**, and design patterns including **CQRS**, **Mediator**, and **Repository**. Experienced in writing unit tests with **XUnit** and **Jest**, working within **CI/CD** pipelines, and applying **JWT**-based authentication. Strong collaborator in Agile environments with a focus on code quality, performance optimization, and continuous learning of Microsoft technologies.

PROFESSIONAL EXPERIENCE

Application Engineer

May 2025 – Present

HelmApps Solutions Private Limited

India

- Develop and maintain enterprise full-stack applications using **.NET Core**, **C#**, and **Angular 15+**, applying **Repository** and **CQRS** patterns for clean, maintainable backend architecture.
- Design and implement **RESTful APIs** with **Entity Framework Core** and **LINQ** for efficient data access and manipulation against **MS SQL** databases.
- Write and maintain unit tests using **XUnit** (backend) and **Jest** (frontend) to ensure reliability and support **TDD** practices across the development lifecycle.
- Integrate code quality checks via **SonarQube** within **CI/CD** pipelines, enforcing coding standards and reducing technical debt across sprint deliverables.
- Collaborate with stakeholders and cross-functional teams to troubleshoot performance issues and deliver scalable solutions, contributing to a **20% reduction in production downtime**.

Trainee Software Engineer

July 2024 – May 2025

HelmApps Solutions Private Limited

India

- Built and maintained **Angular 15+** UI components with **TypeScript**, **HTML5**, and **CSS3**, consuming **REST APIs** for real-time data rendering and dashboard functionality.
- Implemented **JWT**-based authentication flows on the frontend, integrating with **ASP.NET Core** identity services for secure access control.
- Applied **Mediator** pattern in **.NET Core** backend services to decouple request handling and improve testability of business logic.
- Used **Git** workflows including pull requests, branching, merging, and code reviews following Agile/Scrum methodology; contributed to a **25% improvement in deployment efficiency**.

Junior Full-Stack Developer

December 2023 – July 2024

Agileinfo Techytern Solutions Private Limited

India

- Developed full-stack web applications using **JavaScript**, **TypeScript**, **HTML5**, **CSS3**, **REST APIs**, and relational databases within an Agile delivery model.
- Gained hands-on experience in **.NET** backend service development and **MS SQL** database design, including query optimization and CRUD operations.
- Participated in sprint planning, stand-ups, and retrospectives; debugged and resolved production issues to improve application performance and reliability.

PROJECTS

Aerospace KAPP Upgrade & Device Orchestrator Integration

November 2025 – February 2026

- Upgraded a production **.NET Core/Angular** application for global aerospace clients — refactored backend services using **CQRS** and **Repository** patterns for improved scalability and testability.
- Optimized **MS SQL** queries using **LINQ** and **Entity Framework Core**, reducing data retrieval latency and contributing to a **20% reduction in system downtime**.
- Implemented **XUnit** test coverage for critical API endpoints and integrated **SonarQube** analysis into the **CI/CD** pipeline to maintain code quality gates.
- Tech Stack:** .NET Core, C#, Entity Framework Core, LINQ, CQRS, Angular 15+, TypeScript, MS SQL, REST APIs, XUnit, SonarQube, CI/CD

Device Orchestrator & Admin Tool Deployment – Bezecdezín Plant

September 2025

- Developed **ASP.NET Core** API services and **Angular** frontend modules for a hardware admin tool, secured using **JWT** token-based authentication and authorization.
- Applied **Mediator** pattern for request pipeline management; used **Git** pull request workflow for collaborative code review and deployment, achieving **25% faster deployments**.
- Tech Stack:** ASP.NET Core, C#, Angular, TypeScript, JWT, Mediator Pattern, REST APIs, Git

TECHNICAL SKILLS

Backend: .NET Core, ASP.NET Core, C#, REST APIs, Entity Framework Core, LINQ, CQRS, Mediator Pattern, Repository Pattern, XUnit
Frontend: Angular 15+, TypeScript, JavaScript (ES6+), HTML5, CSS3, RxJS, Angular Material, Jest
Database: MS SQL Server, SQL, Query Optimization, Entity Framework Core
Security: JWT Authentication, AuthN/AuthZ, Windows Auth, Basic Auth
DevOps & Quality: CI/CD Pipelines, SonarQube, Git, Pull Requests, Branching & Merging
Methodology: Agile/Scrum, TDD, UML, Code Reviews, Sprint Planning
Tools: Visual Studio, VS Code, Postman, GitHub, GitHub Copilot, ChatGPT

EDUCATION

Bachelor of Technology – Computer Science and Engineering	2019 – 2023
<i>Sarabhai Institute of Science and Technology</i>	<i>Kerala, India</i>

LANGUAGES

English (Proficient), Malayalam (Native), Hindi (Beginner)
